

Exercise: Average Calculation and Semester Validation

Context:

A student is enrolled in the first year of a Bachelor's degree. They are taking two Teaching Units (UE) during Semester 1, each consisting of two modules. Here are the results:

UE	Module	Grade /20	Coefficient
Fundamental UE	Mathematics	12	2
	Computer Science	8	1
Methodological UE	Written Expression	9	1
	Introduction to Law	11	1

Questions:

1. Calculate the weighted average of each UE.
2. Indicate whether each UE is validated by capitalization or compensation.
3. Is the semester validated if compensation is applied?
4. How many credits will be capitalized if the student validates the semester?
