

Exercise 1:

An institute wants a simple application to manage absences. Identify 3 user stories for an initial Product Backlog.

Exercise 2:

A team is working on an application called “University Absence Management.” You are given the following descriptions. For each one, say if it is:

- a role,
 - an event,
 - or an artifact.
-
1. List of all features to be developed
 2. Daily 15-minute meeting
 3. Person responsible for backlog priorities
 4. 2-week work cycle
 5. Chart showing remaining work
 6. Team that develops the product

Exercise 3:

Your team must develop the application "Student Grades Tracking."

Write 5 User Stories to fill the initial Product Backlog. Follow this format:

As a ... I want ... so that ...
